Yes, Gordon,

I am officially endorsing your monumental work. You are an invaluable resource to our nation and Task Force on our effort to protect critical infrastructure, thereby potentially protecting millions of lives.

You paper touches on solar events that were recorded by various spacecraft and sensors in a critical timeline.

With this as a basis, the Task Force can now start to connect anomalies in the subsurface and surface geomagnetic spectrum.

Thanks for adding to our get growing understanding of the Earth's and the Sun's entanglement.

Mr. Glenn Rhoades, MBA
National Executive Director,
Task Force on National and Homeland Security
A Congressional Advisory Board,
501(c)(3)

Verification. Plz "Reply to all" of my email addys

Wed. 14 Oct. 2026

Glenn, this is Gordon. Thank you for clarifying this.

To be clear, here's what I'm asking: Please:

1) confirm that THE TASKFORCE ON NATIONAL AND HOMELAND SECURITY did, in fact, ask me to update my popular 2019 solar flare/ Carrington Event probability paper for THE TASKFORCE review to consider for wider circulation to lawmakers, scientists, or whomever to advocate Grid Security, no more.

While I think my paper is ready for publication on, say, <https://EmpTaskforce.us>, or elsewhere, I'm not asking you to formally endorse my most recent update, or me or any other projects on which I occasionally work, only acknowledge you ask for my credibility.

2) You also expressed interest in adding comments as to the historical importance of my research or, say, need for scientists, lawmakers, and Federal Government to read my research & secure the fragile power, Internet, & Telecommunications grid. That's fine, if you like, but optional, as my readers simply need verification that I did in fact, ask me to update my 2019 paper, for credibility purposes.

P.S.: please "Reply to all" of my email addys regarding my request for verification of your ask.

Gordon

Quick yes/no - can I share the 1-line request note?

Glenn - thanks for note that Robert Miller leads future publishing strategy - understood, I will defer to him on that.

Separate question, just for credibility: Can I publicly share this one-sentence factual note? (No endorsement)

"At the request of the Task Force on National and Homeland Security, Gordon Wayne Watts prepared an updated version of his 2019 solar storm / EMP risk paper for Task Force review. — Glenn Rhoades, National Operations, Task Force on National and Homeland Security, "

If accurate, just reply "yes, accurate, ok to share that line" - I will not share private threads, PII, or any past materials.

Thanks,
